---

EXPERIENCE SUMMARY

- Results-driven software developer with strong foundation in AI, data science, and full-stack web development

- Experienced in Python development, machine learning implementation, and intelligent systems architecture

- Proven ability to deliver complex technical projects from conception to deployment

- Strong background in web development, API integration, and database management

- Collaborative team player with experience in Agile development and version control

- Fast learner committed to expanding knowledge base in emerging technologies

SKILLS SUMMARY

Programming Languages: Python, JavaScript, HTML/CSS, Java, R

AI/ML Technologies: TensorFlow, Data Science, Machine Learning, AI Development

Web Technologies: Front-end Development, API Integration, Web Applications

Database Technologies: SQL, Database Management and Design

Development Tools: Git, Version Control, Agile Project Management

Business Skills: SEO, Personal Brand Management, Project Documentation

Office Applications: Microsoft Office Suite, Accounting & Bookkeeping

PROFESSIONAL EXPERIENCE

AI Software Developer

Independent Development Projects | October 2024 - Present

Developing advanced AI and machine learning applications with focus on intelligent systems and data analysis

Technologies Used: Python, TensorFlow, R, Data Science libraries, Machine Learning frameworks

- **AI Chat Application** - Developed intelligent conversational system using natural language processing and machine learning algorithms
- **Data Analysis Platform** - Built comprehensive data science application for statistical analysis and visualization
- **Machine Learning Models** - Implemented predictive algorithms and trained models for various business applications
- **Database Management System** - Designed and developed relational database solutions with SQL integration

Full-Stack Web Developer

Independent Development Projects | 2024

Created comprehensive web applications demonstrating full-stack development capabilities

Technologies Used: Python, JavaScript, HTML/CSS, Web Frameworks, API Development

- **Portfolio Website** - Developed professional portfolio showcasing technical projects and skills with responsive design
- **Web Application Suite** - Built multiple web applications demonstrating various programming concepts and user interfaces
- **API Integration Projects** - Implemented third-party API connections and custom web services
- **Version Control Management** - Maintained 26 professional repositories demonstrating progression in technical skills

Web Developer

Web PR | June 2019 - October 2024

Contributed to website development, optimization, and maintenance in collaborative team environment

Skills Applied: Front-end development, SEO optimization, API integration, Agile methodology

- Assisted in website development including front-end design and performance optimization
- Collaborated on SEO strategies to improve website performance and search engine rankings
- Participated in development and maintenance of web applications with API integration
- Engaged in daily standups and Agile project management contributing to sprint planning

- Resolved technical issues related to website performance and user experience

- Contributed to project documentation and code reviews ensuring adherence to best practices

EDUCATION & TRAINING

AI Software Development Program | The Tech Academy

Seattle, WA | October 2024 - Present

Intensive bootcamp program focusing on AI, data science, and software development. Comprehensive curriculum covering Python programming, machine learning, TensorFlow, web development, database management, and industry best practices. Hands-on approach with real-world projects demonstrating practical application of advanced programming concepts and emerging technologies.

Core Technologies: Python, TensorFlow, R, JavaScript, HTML/CSS, SQL, Data Science
Specialized Areas: Artificial Intelligence, Machine Learning, Data Analysis, Web Development
Project Portfolio: 26+ repositories showcasing progression from fundamentals to advanced AI applications

Information Technology & Business Certifications

Peninsula College | 2009 - 2010

- Information Technology Core

- Marketing & Entrepreneurship

- Small Business Bookkeeping

- Bookkeeping Science

References and detailed project demonstrations available upon request
